

I CAN...

CREATE

I can draft thumbnail sketches to plan artistic work.

I can create artwork that expresses a big idea or theme.

I can craft artwork that reflects deliberate control of the media.

I can create artwork by combining multiple media, techniques, or processes to visually express a theme or big idea.

PRESENT

I can create art that I would want to buy or that someone would want to purchase.

I can ensure that my project is complete and entirely finished.

I can sign my work using standard Western conventions (lower right hand corner of 2D work, bottom of sculpture work).

I can title and document my art, list the mediums used, and measure the dimensions.

I can choose presentation details (framing, matting, pedestal, staging) which allow my audience to access and understand my work.

RESPOND

I can explain effects that details of an artwork have, and ways that the subject matter and context create meaning.

CONNECT

I can compare the job outlooks, salary, and training for a variety of careers in the Arts, Audio/Video Technology and Communications pathway.

I can compare how the use of photography has changed over time.

I can compare and contrast how different cultures use (insert functional media approach here.)

I can compare how social issues influence artists to create artworks.
